

Until satellite radio, I had quit listening to radio altogether. It had become of such poor quality, it had become nearly worthless. With the advent of satellite radio, I now listen to radio again. Please DO NOT interfere with normal market forces in order to protect the poor system we have had to endure in the past. The NAB is part and parcel of this failed system.

The NAB petition is the equivalent of buggy whip maker protection in the face of the rising popularity of automobiles.

Please don't let the FCC become a hack for the NAB.
